Jagannath Nayak

+91-6291884501 — jagannathnayak865@gmail.com — LinkedIn — GitHub

Professional Summary

Computer Science and Design undergraduate with strong foundations in Java, Python, web development, and problem solving. Experienced in building full-stack applications and AI-driven systems using LLMs, RAG, APIs, and databases. Interested in software development, AI/ML, and web development.

Education

K S Institute of Technology — Bengaluru, India
Bachelor of Engineering in Computer Science & Design — 2023 – 2027

Infocus India Public School — Bengaluru, India
CBSE, Class XI & XII — 2021 – 2023

Projects

Study Material Repository [GitHub]
Web Development, Authentication, AI Chatbot
- Built a role-based platform for teachers to upload and students to access organized study materials.
- Integrated secure authentication and an AI chatbot for student queries.

AI Student Mentor – MentorGPT [GitHub]
RAG, AI/ML, Python
- Developed an AI learning assistant using RAG to explain notes, topics, and recommend learning resources.
- Added multi-level quizzes and a live leaderboard for interactive assessment.

Task Manager [GitHub]
Flask, PostgreSQL, SQLAlchemy, JavaScript
- Developed a full-stack task management application with Flask, PostgreSQL, and SQLAlchemy.
- Deployed the application on Render for production use.

AI-Powered Code Analysis & Documentation Platform [GitHub]
AI/ML, LLMs, Vector Database, CI/CD
- Built an AI platform to analyze GitHub repositories, detect code issues, and generate documentation.
- Integrated semantic code search using embeddings, vector databases, and automated CI/CD validation.

AI & IoT Wardroom Automation and Wound Analysis [Project]
IoT, Raspberry Pi, AI/ML
- Developed an AIoT healthcare system combining Raspberry Pi, IoT sensors, and AI-based wound analysis.
- Implemented wound segmentation, healing-rate tracking, voice assistance, and doctor alerts.

Achievements

- **National Level Hackathon Winner, MIIT, Mysuru** – Developed an AI-driven wardroom automation and wound analysis system.
- **National Level Hackathon Runner-up, KSSEM** – Developed an adaptive AI-based automated quiz generator; received an internship opportunity at Dyashin Technosoft.

Technical Skills

Programming Languages: Java, Python
Web Technologies: HTML, CSS, Web Development
Database: MySQL, PostgreSQL
AI/ML: Machine Learning, Model Training, Agentic AI, LLMs, RAG , Tenserflow, Model Training
APIs: RESTful APIs, API Integration
Development Tools: Git, GitHub, Jira
Concepts: Object-Oriented Programming, Database Management, Software Development, Problem Solving

Soft Skills

Problem Solving, Collaboration, Adaptability, Continuous Learning

Languages

English, Hindi
